PROFESSIONAL SUMMARY

As an IT Lead, **Machine Learning Engineer**, **Backend Developer** and **Data Analyst**, I operate at the intersection of software engineering, data-driven strategy, and team leadership. With a solid foundation in **Artificial Intelligence**, **API design**, **cloud deployment**, and **machine learning**, I deploy AI solutions and high-performance applications that are not only reliable and scalable but also deliver actionable insights and **measurable impact**.

CORE COMPETENCIES

- IT Strategy & Digital Transformation
- Machine Learning and Analytics (Tensorflow, MLflow, PowerBI, SQL, Transformers, Web Scraping)
- Web Development (Python, Django, React.js, FastAPI)
- Cloud Infrastructure (AWS, Kubernetes, Docker, GCP)
- Agile Project Management & CI/CD Automation)
- IT Security, Compliance & Risk Management
- Team Leadership & Mentorship

WORK EXPERIENCE

Freelance

AI Engineer/IT Lead

2023 - 2026

- Design and maintain databases (SQL, NoSQL).
- Build APIs or **ETL pipelines** to pull in raw data from multiple sources.
- Ensure **data integrity**, **security**, and **scalability**.
- Oversee design of high-availability backend APIs developed by Django REST Framework & FastAPI.
- Migrated on-premise infrastructure to AWS, improving system resilience and scalability
- Led **database optimization** efforts, reducing query response times by 60%.
- **Collaborated** with cross-functional teams to translate business requirements into **data-driven AI solutions** with measurable outcomes.
- Developed a **generative AI** integration using **LangChain** and the **Hugging Face Inference API**, implementing a serverless architecture to deploy **Llama 3 models** for **real-time NLP**.

Egalitarian Computers

ML/AI Engineer

2022 - 2025

- Clean, organize, and model data to ensure readiness for analysis and visualization.
- Developed, trained, and **optimized machine learning** and **deep learning models** for classification, regression, NLP, and computer vision applications.
- Perform in-depth **Exploratory Data Analysis (EDA)** using SQL and Python to uncover trends and insights.
- Create **insightful data visualizations** using tools like Jupyter Notebook, Power BI, Tableau, Microsoft Excel, and Looker Studio.
- Conduct **predictive analytics** by applying statistical methods and **machine learning** algorithms in Python.
- Generate actionable insights through the **analysis of complex datasets**, supporting data-

driven decision-making.

- **Design and optimize SQL** queries and database solutions to streamline data retrieval and analysis.
- Develop **ETL pipelines** to ensure efficient extraction, transformation, and integration of data for analysis.
- Provide **training** and **mentorship** on data analysis techniques, Python programming, and machine learning.

Edmoss Global

Backend/ML/AI Engineer

2018 - 2022

- Acquire data from diverse sources using **advanced data collection** and research strategies.
- Prepare datasets for analysis by performing **data cleaning, profiling, wrangling, and modeling**.
- Designed and deployed scalable end-to-end **ML pipelines** using tools such as TensorFlow, Scikit-learn, **MLflow**, and **Docker**.
- Designed and developed highly efficient and scalable **RESTful** backend **APIs** using Django Rest Framework, focusing on optimal performance and reliability for **seamless integration** with front-end applications.
- Built and optimized systems to ensure **cross-platform and device compatibility**, enhancing both front-end web applications and back-end services for consistent user experiences.
- Deployed applications on the **AWS cloud platform**, utilizing services like Elastic Beanstalk, EC2, Lambda, **CloudFormation**, and other cloud technologies to ensure high availability and scalability.
- Conduct **Exploratory Data Analysis (EDA)** and uncover patterns using SQL and Python.
- Build and maintain **ETL pipelines** to enable seamless data extraction, transformation, and integration for data science workflows.
- Conducted A/B testing, **hyperparameter tuning, model optimization, and performance monitoring** to ensure model robustness.
- Implemented **NLP pipelines** including **text classification, sentiment analysis, named entity recognition, and vector embeddings**.
- Leveraged **computer vision** techniques (CNNs, object detection, image segmentation) to automate image-based tasks and improve decision accuracy.

EDUCATION

Lagos State Polytechnic

HND, Computer Science

2013 – 2020

Coven Lab

2019

Data Science

Udacity

2022

Cloud Developer Nanodegree

CERTIFICATE

KPMG AU - Data Analytics Job Simulation – Forage [↗](#)

IBM Data Science Professional [↗](#)

TestDome - Microsoft PowerBI [↗](#)

Django 4.0 Masterclass [↗](#)

Building Batch Data Pipelines on Google Cloud [↗](#)

SELECTED IT PROJECTS

LLM Chat API

- Designed and built a **modular FastAPI backend** for a real-time AI chat system powered by **LangChain** and **Hugging Face LLaMA 3 model**. Designed supports distributed **rate limiting**, and **multi-user scaling**.
- Integrated **session-based conversation memory**, **asynchronous processing** with **asyncio** and thread offloading for non-blocking API performance and Exposed **RESTful endpoints** with **interactive API documentation** using FastAPI Swagger UI.

Web Scraper

- Scrapped multiple web pages using selenium and beautifulsoup, extracted relevant data, organized and clean them for analysis.
- Added a **custom User-Agent header** to mimic a real browser. Helped avoid being flagged as a bot.
- I built a **scheduler** in **run.py** that **triggers this entire process once every 24 hours**, updates the dashboard, and add new lines to the log file during and after every run.

Face Recognition Authentication System

- Developed and trained a machine learning model for **facial recognition** using a **diverse image dataset**.
- Integrated the model into a **Django-based application** to implement **multi-factor authentication** and enhance **system security**.

AI-Powered Document Processing System

- Created a **machine learning solution** for automated **document classification and data extraction**.
- Integrated **OCR (Optical Character Recognition)** with **NLP techniques**, improving efficiency by **80%**

Real-time Analytics Dashboard

- Developed a **business intelligence dashboard** with real-time analytics and data visualization.
- Integrated **Power BI** and **Google Data Studio** for comprehensive reporting and insights.

TECHNICAL SKILLS

- **Programming & Frameworks:** Python, Django, FastAPI, Flask, Celery, JavaScript, SQL, Tensorflow, DRF
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, CloudFormation, SageMaker), Kubernetes, Docker, GCP, MLflow, DVC, Dagshub, Airflow, Github.
- **Data Analytics:** Microsoft Excel, PowerBI, SQL, Python, BigQuery, Google Data Studio
- **Database:** MongoDB, PostgreSQL, MySQL, Firebase
- **IT Management:** IT Strategy, Agile Leadership, IT Security.

INTERESTS & HOBBIES

- **Tech Innovations & AI Research** – Passionate about emerging **AI & cloud computing** trends.
- **Chess & Strategic Thinking** – Enjoy solving **complex IT problems** like chess puzzles.
- **Tech Blogging & Open Source Contributions** – Contributor to **developer forums & GitHub projects**.
- **Travel & Cultural Exploration** – Exploring different cultures & their **technology landscapes**.
