🐙 victoromuya

PROFESSIONAL SUMMARY

A solution-oriented Data Analyst with expertise in **web scraping, data cleaning, data mining, statistical analysis, API integrations, machine learning** and **dashboard development**. Experienced in using tools such as **Python, SQL, Excel**, and **Power BI** to transform raw data into meaningful insights. Known for **strong problem-solving skills**, attention to detail, and the ability to **communicate Insights** clearly to technical and non-technical stakeholders.

CORE COMPETENCIES

- IT Strategy & Digital Transformation
- Machine Learning and Data Analytics
- Web Development
- Cloud Infrastructure (AWS, GCP)
- IT Security, Compliance & Risk Management
- Team Leadership & Mentorship

WORK EXPERIENCE

Mega Meal

Data Analyst/IT Lead

2023 - 2026

- Design and maintain databases (SQL, NoSQL).
- Build APIs or **ETL pipelines** to pull in raw data from multiple sources.
- Ensure **data integrity, security, and scalability**.
- Perform data mining, data analysis and **extracting valuable insights and recommendations**
- Led **database optimization** efforts, reducing query response times by 60%.
- Managed cross-functional teams, integrating agile workflows to enhance project delivery speed.
- **Collaborated** with cross-functional teams to translate business requirements into **data-driven AI solutions** with measurable outcomes.

Egalitarian Computers

Data Analyst

2022 - 2025

- **Clean, organize, and model data** to ensure readiness for analysis and visualization.
- Developed, trained, and **optimized machine learning and deep learning models** for classification, regression, NLP, and computer vision applications.
- Perform in-depth **Exploratory Data Analysis (EDA)** using SQL and Python to uncover trends and insights.
- Create **insightful data visualizations** using tools like Jupyter Notebook, Power BI, Tableau, Microsoft Excel, and Looker Studio.
- Conduct **predictive analytics** by applying statistical methods and **machine learning** algorithms in Python.
- Generate actionable insights through the **analysis of complex datasets**, supporting data-driven decision-making.
- **Design and optimize SQL** queries and database solutions to streamline data retrieval and analysis.

- Develop **ETL pipelines** to ensure efficient extraction, transformation, and integration of data for analysis.
- Provide **training** and **mentorship** on data analysis techniques, Python programming, and machine learning.

Edmoss Global

Data Analyst/ML Engineer2018 - 2022

- Acquire data from diverse sources using **advanced data collection** and research strategies.
- Prepare datasets for analysis by performing **data cleaning, profiling, wrangling, and modeling**.
- Designed and deployed scalable end-to-end **ML pipelines** using tools such as TensorFlow, Scikit-learn, **MLflow**, and **Docker**.
- Designed and developed highly efficient and scalable **RESTful** backend **APIs** using Django Rest Framework, focusing on optimal performance and reliability for **seamless integration** with front-end applications.
- Conduct **Exploratory Data Analysis (EDA)** and uncover patterns using SQL and Python.
- Build and maintain **ETL pipelines** to enable seamless data extraction, transformation, and integration for data science workflows.
- Conducted **A/B testing, hyperparameter tuning, model optimization, and performance monitoring** to ensure model robustness.
- Implemented **NLP pipelines** including **text classification, sentiment analysis, named entity recognition, and vector embeddings**.

Globaltech

Facilitator2015 - 2017

- Taught Java and SQL to students.
- Prepared notes for every class.
- Tested students by giving them projects to execute.
- Conducted a general exam at the end of the program.

EDUCATION

Lagos State Polytechnic

HND, Computer Science2013 – 2020

Coven Lab

2019

Data Science

Udacity

2022

Cloud Developer Nanodegree

CERTIFICATE

KPMG AU - Data Analytics Job Simulation – Forage [↗](#)

IBM Data Science Professional [↗](#)

TestDome - Microsoft PowerBI [↗](#)

Django 4.0 Masterclass [↗](#)

Building Batch Data Pipelines on Google Cloud [↗](#)

SELECTED PROJECTS

Product Recommendation Analysis

- Analyzed a product sales data to extract insights such as **number of customers, products, and transactions, purchase frequency per customer, distribution of ratings**, etc.
- Performed **Customer segmentation** by grouping customers based on their behaviors using **Clustering algorithm**. Segmentations include Loyal Customers, High spenders and New Customers. This helps to tailor **recommendation** to each customer group.

Time Efficiency Analysis

- Performed an analysis on how time is spent on operations. Metrics used includes; **Task Completion time, Average processing time, Downtime, Waiting time**. Insight revealed that employees spend **30%** of their time waiting for approvals and system responses.
- **Evaluated operational costs and identify savings opportunities**. Analysis was done to extract; Cost per unit, Operational expenses, Labor costs, Waste costs. Insights showed that automating certain steps could reduce labor cost by **20% or more**.

AI-Powered Document Processing System

- Created a **machine learning solution** for automated **document classification and data extraction**.
- Integrated **OCR (Optical Character Recognition)** with **NLP techniques**, improving efficiency by **80%**
- Packaged the solution as an **Django Rest API** and did the API documentation with **SwaggerUI**

Real-time Analytics Dashboard

- Developed a **business intelligence dashboard** with real-time analytics and data visualization.
- Used **Power BI** and **Google Data Studio** for comprehensive reporting and insights.

TECHNICAL SKILLS

- **Data Analytics:** Microsoft Excel, PowerBI, SQL, Python, PowerPoint, Pandas, A/B Testing, SciPy, Seaborn
- **Programming & Frameworks:** Python, Django, JavaScript, SQL, Tensorflow, Flask
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, Redshift, SageMaker), Kubernetes, Docker, GCP, MLflow, Dagshub
- **Database:** MongoDB, PostgreSQL, MySQL, Firebase
- **IT Management:** IT Strategy, Agile Leadership, IT Security.

INTERESTS & HOBBIES

- **Tech Innovations & AI Research** – Passionate about emerging **AI & cloud computing** trends.
- **Chess & Strategic Thinking** – Enjoy solving **complex IT problems** like chess puzzles.
- **Tech Blogging & Open Source Contributions** – Contributor to **developer forums & GitHub projects**.
- **Travel & Cultural Exploration** – Exploring different cultures & their **technology landscapes**.
