PROFESSIONAL SUMMARY

As an IT Lead, **Data, ML, Backend Engineer** and **Data Analyst**, I operate at the intersection of software engineering, data-driven strategy, and team leadership. With a solid foundation in **Artificial Intelligence, API design, cloud deployment**, and **Data Engineering**, I build reliable data engineering pipelines, used for high-performance applications that are not only scalable but also deliver actionable insights and **measurable impact**.

CORE COMPETENCIES

- IT Strategy & Digital Transformation
- Machine Learning
- Data Engineering and Analytics
- Web Development
- Cloud Infrastructure
- Agile Project Management & CI/CD Automation
- IT Security, Compliance & Risk Management
- Team Leadership & Mentorship

WORK EXPERIENCE

Freelance

Data Engineer/IT Lead

2023 till date

- Design and maintain **data warehouses** and databases (**SQL, NoSQL**).
- Built **data pipelines** using tools like **Redshift, S3, Glue, Lambda**
- Automate end-to-end Data Engineering **pipeline** using **Airflow, DVC** for version control
- Ensure **data integrity, security, and scalability**.
- Oversee design of high-availability backend APIs developed by Django REST Framework & FastAPI.
- Migrated on-premise infrastructure to AWS, improving system resilience and scalability
- Led **database optimization** efforts, reducing query response times by 60%.
- Managed cross-functional teams, integrating agile workflows to enhance project delivery speed.
- **Collaborated** with cross-functional teams to translate business requirements into **data-driven AI solutions** with measurable outcomes.

Egalitarian Computers

ML/Data Engineer

2022 - 2025

- Clean, organize, and model data to ensure readiness for analysis and visualization.
- Developed, trained, and **optimized machine learning** and **deep learning models** for classification, regression, NLP, and computer vision applications.
- Perform in-depth **Exploratory Data Analysis (EDA)** using SQL and Python to uncover trends and insights.
- Create **insightful data visualizations** using tools like Jupyter Notebook, Power BI, Tableau, Microsoft Excel, and Looker Studio.
- Conduct **predictive analytics** by applying statistical methods and **machine learning** algorithms in Python.
- Generate actionable insights through the **analysis of complex datasets**, supporting data-driven decision-making.
- **Design and optimize SQL** queries and database solutions to streamline data retrieval and analysis.

- Develop **ETL pipelines** to ensure efficient extraction, transformation, and integration of data for analysis.
- Provide **training** and **mentorship** on data analysis techniques, Python programming, and machine learning.

Edmoss Global

Backend/ML Engineer

2018 - 2022

- Acquire data from diverse sources using **advanced data collection** and research strategies.
- Prepare datasets for analysis by performing data cleaning, profiling, wrangling, and modeling.
- Designed and deployed scalable end-to-end **ML pipelines** using tools such as TensorFlow, Scikit-learn, **MLflow**, and **Docker**.
- Designed and developed highly efficient and scalable **RESTful** backend **APIs** using Django Rest Framework, focusing on optimal performance and reliability for **seamless integration** with front-end applications.
- Built and optimized systems to ensure **cross-platform and device compatibility**, enhancing both front-end web applications and back-end services for consistent user experiences.
- Created machine learning applications using Django, Flask, Scikit-learn, and TensorFlow, building solutions for recommendation systems, natural language processing, and face recognition powered by deep learning models.
- Deployed applications on the **AWS cloud platform**, utilizing services like Elastic Beanstalk, EC2, Lambda, CloudFormation, and other cloud technologies to ensure high availability and scalability.
- Conduct **Exploratory Data Analysis (EDA)** and uncover patterns using SQL and Python.
- Design and implement scalable data models, database schemas, and storage solutions for data science applications.
- Build and maintain **ETL pipelines** to enable seamless data extraction, transformation, and integration for data science workflows.
- Conducted A/B testing, **hyperparameter tuning**, **model optimization**, and **performance monitoring** to ensure model robustness.
- Implemented **NLP pipelines** including text classification, sentiment analysis, named entity recognition, and vector embeddings.
- Leveraged **computer vision** techniques (CNNs, object detection, image segmentation) to automate image-based tasks and improve decision accuracy.

Globaltech

Facilitator

2015 - 2017

- Taught Java and SQL to students.
- Prepared notes for every class.
- Tested students by giving them projects to execute.
- Conducted a general exam at the end of the program.

EDUCATION

Lagos State Polytechnic

HND - Computer Science (Distinction)

2013 - 2020

Coven labs

Data Science

2019

Udacity

Cloud Developer Nano Degree

May 2022 - Aug 2022

CERTIFICATE

KPMG AU - Data Analytics Job Simulation – Forage [!\[\]\(1d3a1175dd4902218e694b9c098adb83_img.jpg\)](#)

IBM Data Science Professional [!\[\]\(c507f772dba2b921f86777f01218e570_img.jpg\)](#)

TECHNICAL SKILLS

- **Programming & Frameworks:** Python, Django, FastAPI, Flask, Celery, JavaScript, SQL, Tensorflow, DRF, Pandas
- **Data Engineering & Cloud:** AWS (EC2, S3, Lambda, CloudFormation, SageMaker, Redshift, Glue), Kubernetes, Docker, GCP, MLflow, DVC, Dagshub, Airflow, Github, Kubernetes
- **Data Analytics:** Microsoft Excel, PowerBI, SQL, Python, BigQuery, Google Data Studio
- **Database:** MongoDB, PostgreSQL, MySQL, Firebase
- **IT Management:** IT Strategy, Agile Leadership, IT Security.

INTERESTS & HOBBIES

- **Tech Innovations & AI Research** – Passionate about emerging **AI & cloud computing** trends.
- **Chess & Strategic Thinking** – Enjoy solving **complex IT problems** like chess puzzles.
- **Tech Blogging & Open Source Contributions** – Contributor to **developer forums & GitHub projects**.
- **Travel & Cultural Exploration** – Exploring different cultures & their **technology landscapes**.
